COVID-19 UPDATES

We fully understand that you may have questions and concerns about the current coronavirus (COVID-19) health crisis. We want you to know that our practice is preparing to the fullest extent possible while providing you with top-of-the-line care.

Our highest priority is the health and safety of our patients, families, and staff. We are exercising increased precautions to reduce the risk of patients' exposure to **COVID-19**, including frequent sanitation of exam rooms, waiting rooms, and reception areas. We're also communicating necessary steps with patients who think they have related symptoms to ensure the safety of other patients and staff.

In order to keep patients and staff safe, we will be changing our normal operations to reflect the following:

- a. **Well visits will take place in the morning only.**
- b. **Sick visits will take place in the afternoon only. Patients will undergo a screening over the phone.**
- c. **Absolutely no walk-in appointments will be allowed.**
- d. **Telemedicine visits have been established to provide you access to safe medical care**
- e. **We've suspended our extended hours in the afternoon until the crisis passes.**
- f. **Saturday mornings are reserved for sick appointments only**

For more information, do not hesitate to call the office. Please know we are here to care for all your healthcare needs throughout this crisis. Persons suspecting exposure should call the Dept. of Health, at **866-779-6121**

We encourage you to visit [coronavirus.gov](https://www.coronavirus.gov) to help you stay up to date with the latest developments.
