Pt. Name:

DOB:

Dear

We are very happy to announce that we offer a comfortable and non-invasive treatment option for snoring and Obstructive Sleep Apnea (OSA) with a simple and comfortable Oral Appliance that has been shown to be more comfortable and tolerable than a CPAP.

Patients all over the world have fallen in love with the simplicity, comfort and effectiveness of Oral Appliance Therapy (OAT) and MAD-FIT oral appliances. Oral appliances are worn inside the mouth, similar to retainers or a mouth guard, they can be used alone or in conjunction with (CPAP) to reduce snoring and treat OSA by preventing the airway from collapsing.

Please call our office for more information about our practice and how oral appliances work and set up a consultation to see if you are a candidate for a custom oral appliance. We are happy to work with your medical insurance, which routinely covers this therapy for patients who meet their criteria. Our office is part of the APP-NEA network of MAD-FIT certified dentists and perform benefit checks, pre-authorizations and billing of claims for OAT to medical carriers. APP-NEA's mission is to simplify the diagnosis, treatment, and management of sleep disordered breathing. App-NEA does this to serve both healthcare professionals and patients. Through APP-NEA, sleep physicians and dentists can offer services and solutions that will more effectively help their patients and grow their practices. APP-NEA offers a way forward for people who suffer from OSA and snoring. APP-NEA diminishes the barriers that too many encounter on their path to restful sleeps, improved daytime function and greater quality of life.

We look forward to seeing you soon and helping you to get a better night's rest so you can have an energized and productive day!

Sincerely,

Dr. Oluwadayo O. Oluwadara, MS, PHD, DDS

Shebah Dental (Mini Dental Implants)
