

# COVID-19 Minimum Standards of Safe Practice Notice

In accordance with the Texas Medical Board mandate, Texas Orthopedics has adopted the following standards:

1. Screening every patient, visitor, physician and staff member for signs and symptoms of COVID-19 per CDC guidelines. Individuals not passing facility screening are not admitted to the office.
2. Requiring social distancing for patients and staff. Efforts include limiting visitors and asking patients to wait in their car for appointments as needed.
3. Requiring a mask or face covering for all staff, patients, and physicians.
4. Maintaining strict cleaning standards on all hard surfaces, chairs, counter tops, shared work spaces, and bathrooms.
5. Encouraging consistent hand-washing with sanitizing stations throughout our facilities.

***Texas Orthopedics is not a testing facility. Anyone needing COVID-19 testing should go elsewhere.***
